# EXERCISE: BUILD AND INTEGRATE A COMPLETE SYSTEM SCENARIO: FEEDBACK MANAGEMENT SYSTEM

Name: Harini Sree R
Email ID: 727723eucd019@skcet.ac.in

---

## PURPOSE

The goal of this system is to collect, store, and display student feedback on courses or products in a fully automated manner:

- Students submit feedback through Jotform.
- Data is automatically stored in Airtable.
- Bubble dashboard displays feedback in real-time for analysis.

This system eliminates manual entry, reduces errors, and provides an interactive dashboard.

## TOOLS USED

1. Jotform – Collect student feedback through online forms
2. Airtable – Store feedback records with structured data
3. Make (Integromat) – Automate data transfer between Jotform, Airtable, and Bubble
4. Bubble – Build a dashboard and visualize feedback data

## LEARNER'S RESPONSE

### WORKFLOW

Jotform Form Submission

Bubble API / Direct Push

↓

Dashboard Repeating Group

## TOOLS USED IN IMPLEMENTATION

1. Bubble – Website/dashboard creation & workflow handling; display feedback dynamically in repeating groups
2. Jotform – Online feedback form for students/customers to submit ratings and comments
3. Airtable – Database for storing all feedback records with structured fields
4. Make (Integromat) – Automation platform to transfer data from Jotform → Airtable → Bubble automatically
5. Bubble API Connector – Fetch data from Airtable into Bubble for real-time dashboard updates
6. Repeating Group (Bubble element) – Visual display of feedback records with filters and sorting

## CHALLENGES FACED

1. Understanding API authentication (Airtable token vs API key) was initially confusing
2. Configuring correct headers in Bubble API Connector required careful attention
3. Workflow conditions in Bubble (like incorrect "Only when" logic) caused errors initially
4. Learning how external tools (Bubble, Jotform, Airtable) communicate helped build a real-world integration mindset

Dear Student,
Thank you for submitting your course feedback.
Your response has been successfully recorded.
Your feedback helps improve the learning experience.
Regards,
Feedback Evaluation System
